Re: Email Sign-On Implementation

Dear Rob

Email sign-on is a piece of functionality within the FSP system that was developed and rolled out in 2015. Clients have been upgrading to this form of client/member/administrator login wholeheartedly as a sport, or in stages seasonally.

We have now been phasing out the old numerical username/password method of login for a number of years for all clients, with the successful completion of the Aussie Hoops project to move to email sign-on being the most recent for basketball.

With the focus now heavily on the sport's upgrade to the GameDay Platform this year, this old method will no longer be supported in The Basketball Network and neither will there be future development on it.

It is therefore a requirement nationally that email sign-on be in place on FSP in order for the mapping of data between the two platforms to be possible.

Given the seasonality of the sport, we request that all remaining databases nationally be upgraded to email sign-on by the end of Q1, 2019, in order to meet the requirements of the upgrade project.

The team at SportsTG is committed to making the transition as smooth as possible for you and will work closely with BA & all impacted States in order to do so.

We look forward to working with you on this project.

Kind regards

Sophie Downie
Director of Account Management
